

EDITORIAL POLICIES AND PROCESS

Our main objective is to publish a scientific medical journal of consistent high quality and help to increase exposure to literature written by professionals at a global level.

Original research, literature review, clinical case reports, consensus declaration coming from an association or a group of specialists, letters to the editor and book reviews are covered by the scope of the published material. All aspects of maternal-fetal & neonatal medicine are presented in a scientific way, starting each year with abstract articles with keywords, backed up by references in accordance with the Vancouver citation style.

The journal encourages the submission of papers with a clinical approach, practical or management oriented, besides papers that bridge the gap between research and clinical application.

The manuscripts received are first revised by the editors-in-chief to check if they are appropriate for publishing in “**Romanian Journal of Veterinary Medicine & Pharmacology (RJVMF)**” and if they comply with the author’s guidelines. The manuscripts are then forwarded to two or more professional reviewers. Anonymity of both the author and reviewer is preserved (double blinded peer review process).

The golden key to our success is our editorial policy which controls the quality of the articles and ensures their accuracy, clarity, and smooth readability via the contribution of a high level enthusiast international team of experts.

Bridging the gap between advanced update peer-reviewed veterinary medicine literature and the practitioners enabling them to do their jobs better is our ultimate target. Besides, the “**Romanian Journal of Veterinary Medicine & Pharmacology (RJVMF)**” provides readers with information regarding the available products, news and proceedings of veterinary medicine symposiums, workshops, conferences and congresses.

The “**Romanian Journal of Veterinary Medicine & Pharmacology (RJVMF)**” makes every effort to report clinical information and news on manufacturers’ products accurately, but cannot assume responsibility for the validity of product claims.

Opinions or interpretations expressed by the authors are their own and do not necessarily reflect nor hold the “**Romanian Journal of Veterinary Medicine & Pharmacology (RJVMF)**” team responsible for the validity of the content.
